FITZONE

Fitness Center Website

Consolidated Project Report

Project Type	Beginner Web Development Project
Technologies	HTML + CSS
Design Theme	Dark background with orange highlights

A static fitness website demonstrating page layout, navigation, membership plans, class schedules, and a demo registration form.

1. Project Overview

Project name: FITZONE – Fitness Center Website

Objective: To create a gym website that presents workout programs, trainers, facilities, membership plans, a weekly class schedule, and a demo registration form.

٦ Technologies used: HTML for page structure and CSS for styling and responsive layout.
r_

Design theme: Black and charcoal backgrounds with bright orange accents, bold headings, cards, and responsive grids.

2. Webpage Preview

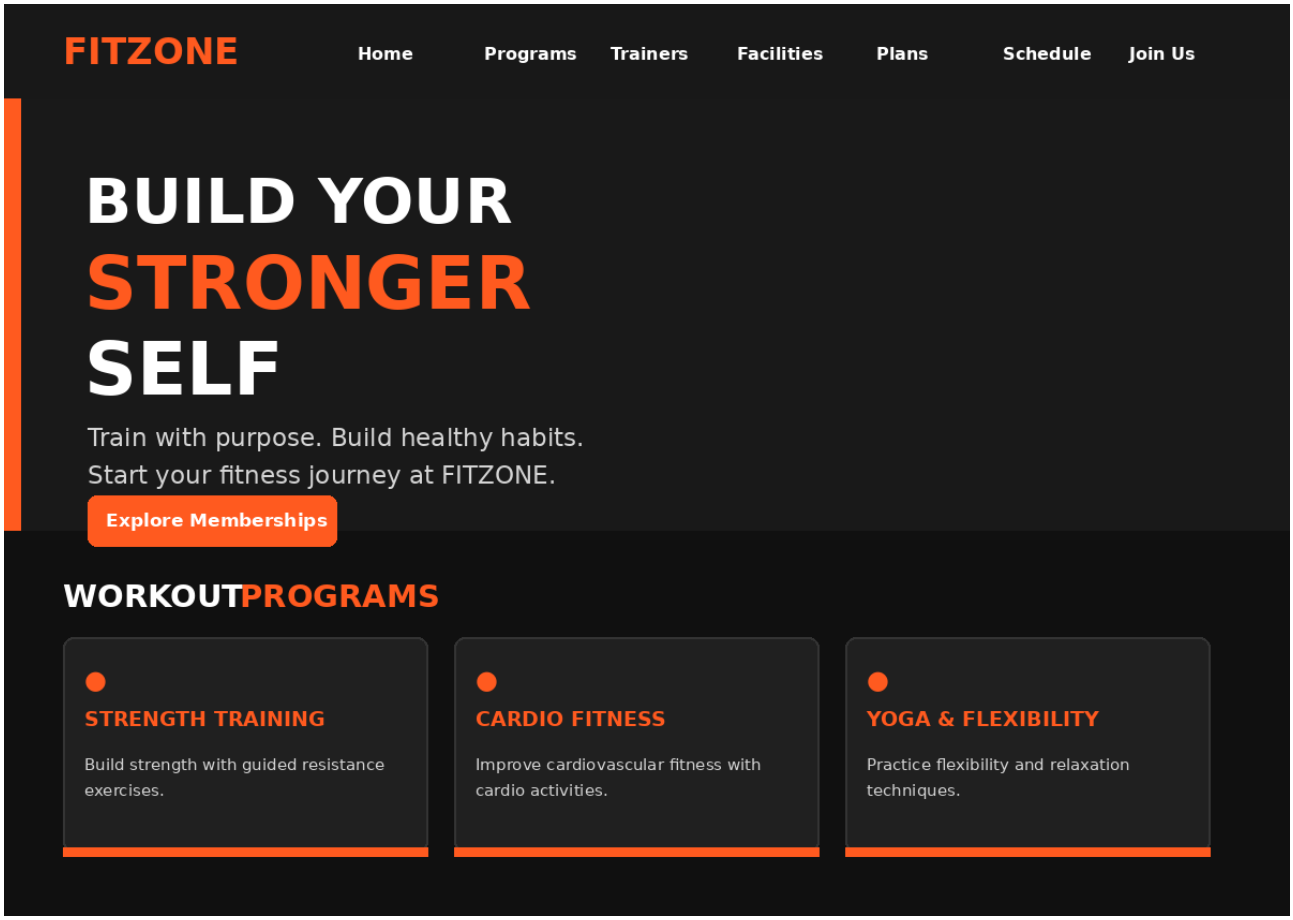

Figure 1. Recreated visual preview based on the supplied FITZONE HTML and CSS.

3. Main Features

Feature	Description
Header & navigation	FITZONE branding and links to Home, Programs, Trainers, Facilities, Plans, Schedule, and Join Us.
Hero section	Promotional heading, fitness message, background image, and Explore Memberships button.
Workout programs	Strength Training, Cardio Fitness, and Yoga & Flexibility cards.
Trainer profiles	Three sample trainer profiles with images and training specialties.
Facilities	Weight Area, Cardio Zone, Changing Rooms, and Yoga Studio.
Membership plans	Basic, Premium, and Annual plans with sample prices and included benefits.
Class schedule	Weekly timetable listing class, time, and trainer.
Registration form	Collects name, email, phone number, membership plan, fitness goal, and optional message.
Responsive layout	CSS media queries adjust grids and navigation for smaller screens.

4. HTML and CSS Summary

HTML defines the header, navigation, content sections, cards, pricing table, registration fields, and footer.
CSS controls colors, typography, spacing, hover effects, grid layouts, and responsive behavior.

5. Limitations

This is a front-end demonstration only. Registration details are not sent to a server or stored in a database. Membership prices, trainer profiles, and class timings are sample content. The message does not represent a real booking or payment. Images load from external Unsplash URLs and require an internet connection.

6. Conclusion

FITZONE demonstrates a multi-section fitness website built with HTML and CSS. It includes responsive design, program and trainer cards, membership pricing, and a class schedule. A backend and database could be added later for real membership registration.

Complete source code is provided separately in FITZONE_Source_Code.pdf.

FITZONE – Source Code

Appendix A – Updated source code supplied by the user (HTML and CSS).
