SHOPEASY

Online Shopping Webpage

Consolidated Project Report

HTML + CSS + JavaScript | Beginner Web Development Project

1. Project Overview

Project name	ShopEasy – Online Shopping Webpage
Objective	To create a sample online shopping webpage where users can browse product categories, view featured products and prices, and add items to a demo cart.
Technologies used	HTML for structure, CSS for styling and responsive layout, and JavaScript for the demo Add to Cart interaction.
Design theme	Navy blue, bright blue, purple, white, and yellow accents, with a light gray background.

2. Webpage Preview

Shop by Category: Electronics • Fashion • Accessories • Lifestyle

■ **Smartphone** ■16,000 20% OFF | Rating 4.2	■ **Laptop** ■45,000 25% OFF | Rating 4.8
■ **Headphones** ■1,400 30% OFF | Rating 4.3	■ **Smart Watch** ■2,700 10% OFF | Rating 4.1

Figure 1. Preview layout recreated from the supplied HTML, CSS, and JavaScript.

3. Main Features

Feature	Description
Navigation bar	Contains the ShopEasy logo, Home, Categories, Products, Offers, search field, and Cart link.
Promotional banner	Highlights the Big Shopping Festival, special prices, discount messaging, and Shop Now link.
Product categories	Shows Electronics, Fashion, Accessories, and Lifestyle.
Featured products	Displays a smartphone, laptop, headphones, and smart watch with descriptions, ratings, prices, and discounts.

Feature	Description
Add to Cart demo	JavaScript increases a demo cart counter and displays an alert with product name, price, and number of items added.
Special offer section	Promotes student offers and provides an Explore Deals link.
Responsive layout	CSS media queries adjust product cards and navigation for tablet and mobile screen sizes.

4. HTML, CSS and JavaScript Summary

HTML defines the navigation bar, promotional banner, product categories, product cards, special offer section, and footer. CSS controls the color palette, layout, product grid, hover effects, spacing, pricing styles, and responsive behavior. JavaScript handles the demo Add to Cart action by incrementing a cart count and showing an alert with the selected product's details.

Navigation links use section IDs such as #home, #categories, #products, and #offers to move to matching parts of the page.

5. Limitations

This is a front-end demonstration. The search field does not perform actual product searches, the Cart link only navigates to the products section, and cart items are not stored in a real shopping cart. There is no database, user login, payment gateway, order processing, or backend. Product details and prices are static sample values in the source code.

6. Conclusion

ShopEasy is a beginner-friendly online shopping webpage that demonstrates core HTML, CSS, and JavaScript concepts. It presents product categories, discounts, ratings, prices, responsive product cards, and a simple Add to Cart alert. Backend services and real cart, search, and checkout functionality could be added in a future version.

Appendix A – Source Code

The following appendix contains the source code supplied for the ShopEasy project.

```
&lt;!DOCTYPE html&gt;
