STUDENT DASHBOARD

Personal Academic Dashboard Webpage

Consolidated Project Report

B.Tech CSE Student | Web Development Project

HTML + CSS | Beginner Web Development Project

1. Project Overview

Project name	Student Dashboard – Personal Academic Dashboard Webpage
Objective	To create a student dashboard that presents student details, academic summary, semester results, attendance, subjects, exam schedule, and announcements in one place.
Technologies used	HTML for webpage structure and CSS for styling, layout, responsive design, and visual elements.
Design theme	Navy blue, bright blue, white, and light slate backgrounds for a clean academic dashboard.

2. Webpage Preview

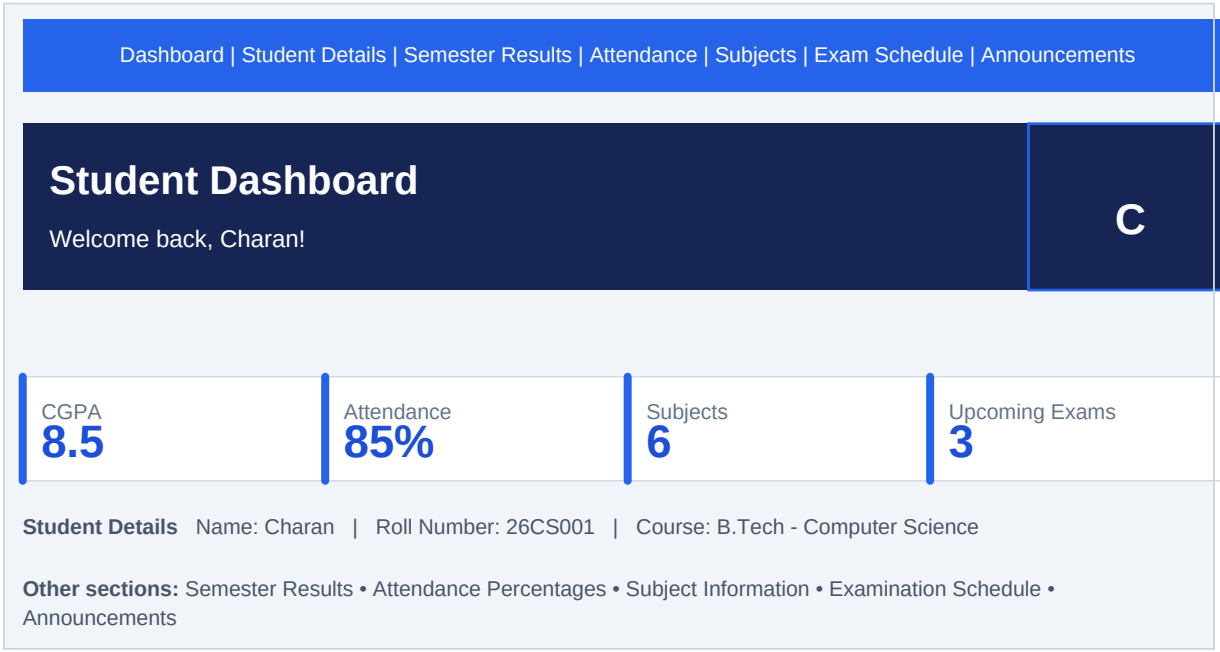

Figure 1. Preview layout recreated from the supplied HTML and CSS.

3. Main Features

Feature	Description
Sidebar navigation	Links to Dashboard, Student Details, Semester Results, Attendance, Subjects, Exam Schedule, and Announcements.
Student details	Displays the student name, roll number, course, year, and semester.
Summary cards	Shows CGPA (8.5), attendance (85%), number of subjects (6), and upcoming exams (3).
Semester results	Table displays semester, credits, SGPA, and result status.
Attendance	Displays subject-wise attendance with visual progress bars.
Subject information	Table lists subject names, codes, credits, and faculty.
Examination schedule	Table lists examination subjects, dates, and times.

Feature	Description
Announcements	Displays assignment, examination, and attendance notices.
Responsive layout	CSS media queries adjust the dashboard layout for smaller screens.

4. HTML and CSS Summary

HTML defines the dashboard sidebar, header, student profile details, summary cards, results and subjects tables, attendance bars, examination schedule, announcements, and footer. CSS controls the colors, typography, spacing, cards, table appearance, progress bars, hover effects, and responsive layout.

The sidebar navigation uses section IDs such as #home, #profile, #results, #attendance, #subjects, #exams, and #announcements to move to matching sections on the page.

5. Limitations

The dashboard uses static sample data in the HTML. No database, authentication, backend, or live student information system is connected. The values for CGPA, attendance, subjects, results, exam dates, and announcements must be updated manually in the source code. The page is a front-end demonstration rather than a functioning college portal.

6. Conclusion

The Student Dashboard is a beginner-friendly static webpage demonstrating HTML and CSS concepts. It organizes student details and academic information into a dashboard layout, includes navigation and visual attendance indicators, and adapts its layout for smaller screens. A backend or database can be added later to support live data and student login.

Appendix A – Source Code

The following source code was provided for the Student Dashboard project.

```
&lt;!DOCTYPE html&gt;
&lt;html lang="en"&gt;
&lt;head&gt;
    &lt;meta charset="UTF-8"&gt;
    &lt;meta name="viewport" content="width=device-width, initial-scale=1.0"&gt;
    &lt;title&gt;Student Dashboard&lt;/title&gt;
    &lt;style&gt;
* {
    box-sizing: border-box;
