# STUDENT DASHBOARD

## Personal Academic Dashboard Webpage

Consolidated Project Report

B.Tech CSE Student | Web Development Project

HTML + CSS | Beginner Web Development Project

# 1. Project Overview

| | |
|---|---|
| **Project name** | Student Dashboard – Personal Academic Dashboard Webpage |
| **Objective** | To create a student dashboard that presents student details, academic summary, semester results, attendance, subjects, exam schedule, and announcements in one place. |
| **Technologies used** | HTML for webpage structure and CSS for styling, layout, responsive design, and visual elements. |
| **Design theme** | Navy blue, bright blue, white, and light slate backgrounds for a clean academic dashboard. |

# 2. Webpage Preview

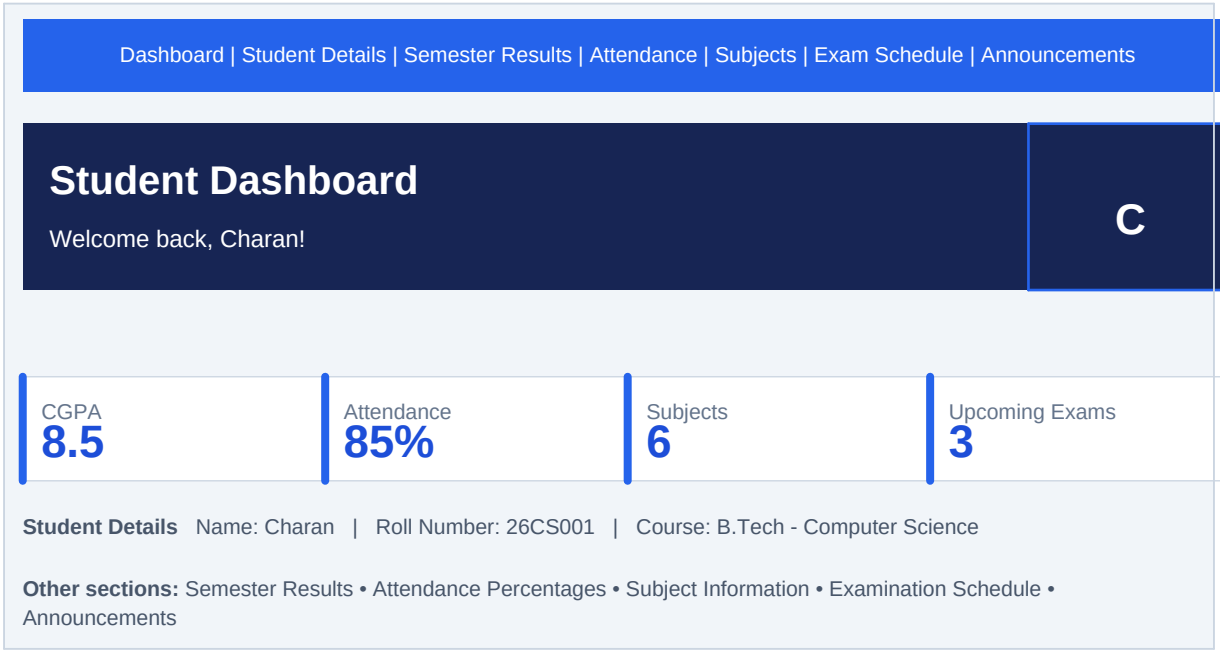

Figure 1. Preview layout recreated from the supplied HTML and CSS.

# 3. Main Features

| Feature | Description |
|---|---|
| Sidebar navigation | Links to Dashboard, Student Details, Semester Results, Attendance, Subjects, Exam Schedule, and Announcements. |
| Student details | Displays the student name, roll number, course, year, and semester. |
| Summary cards | Shows CGPA (8.5), attendance (85%), number of subjects (6), and upcoming exams (3). |
| Semester results | Table displays semester, credits, SGPA, and result status. |
| Attendance | Displays subject-wise attendance with visual progress bars. |
| Subject information | Table lists subject names, codes, credits, and faculty. |
| Examination schedule | Table lists examination subjects, dates, and times. |

| Feature | Description |
| --- | --- |
| Announcements | Displays assignment, examination, and attendance notices. |
| Responsive layout | CSS media queries adjust the dashboard layout for smaller screens. |

## 4. HTML and CSS Summary

HTML defines the dashboard sidebar, header, student profile details, summary cards, results and subjects tables, attendance bars, examination schedule, announcements, and footer. CSS controls the colors, typography, spacing, cards, table appearance, progress bars, hover effects, and responsive layout.

The sidebar navigation uses section IDs such as #home, #profile, #results, #attendance, #subjects, #exams, and #announcements to move to matching sections on the page.

## 5. Limitations

The dashboard uses static sample data in the HTML. No database, authentication, backend, or live student information system is connected. The values for CGPA, attendance, subjects, results, exam dates, and announcements must be updated manually in the source code. The page is a front-end demonstration rather than a functioning college portal.

## 6. Conclusion

The Student Dashboard is a beginner-friendly static webpage demonstrating HTML and CSS concepts. It organizes student details and academic information into a dashboard layout, includes navigation and visual attendance indicators, and adapts its layout for smaller screens. A backend or database can be added later to support live data and student login.

# Appendix A – Source Code
